

Expanding Horizons: EMS-Tech Builds on Early Australian Success, Opens Brisbane Office

[Brisbane, Australia, November 21, 2023] – EMS-Tech, a trailblazer in innovative high-capacity Bulk Material Handling systems, proudly announces the opening of EMS-Tech Australia Pty. in Brisbane, QLD. This milestone underscores EMS-Tech's long-standing commitment and sustained presence in the Australian market.

The inauguration of EMS-Tech Australia marks a pivotal moment in the company's journey that began in 2003. From the early partnerships that laid the groundwork for the brand to the notable delivery of self-unloading and transshipment systems over the last decade, EMS-Tech has been an unwavering force in the Australian market.

EMS-Tech's expansion through EMS-Tech Australia represents not just a physical presence but a strategic reinforcement of the company's technical capabilities in the market. The new office will play a crucial role in bolstering support for existing clients and exploring untapped opportunities, continuing their legacy of innovation while adapting to the evolving needs of the industry.

Peter Sorensen, CEO at EMS-Tech, expressed enthusiasm about the inauguration, stating, "The launch of EMS-Tech Australia underscores our deep-rooted commitment to the Australian market and our valued clients. It's not just about an office; it's a testament to our unwavering dedication to delivering cutting-edge solutions and fostering enduring partnerships."

As this new milestone is inaugurated, it signifies not just an opening but a strategic leap forward. This moment serves as a launchpad for EMS-Tech's expansive vision. With this new location as a stepping stone, EMS-Tech eagerly anticipates further growth across the country, solidifying their commitment to serving clients nationwide.
